**Transitioning from a student-athlete at UCLA to now working with our assistant coaches, staff and basketball student-athletes, I have really grown to appreciate and admire the impact that UCLA Basketball has on the campus that always is bustling with energy. Additionally, with 25 sports, every week there is a new aspect of producing and executing our home games. Every aspect of the game is important.**

---

**My favorite part of working in college athletics is that I love the excitement of being a part of the team, the challenges of working on college game day, and the opportunity to be at the center of things.**

---

**I am so grateful to be a part of the UCLA family and to have the opportunity to work with so many talented people.**
